Table Races

Purpose:
To engage students in the processing of content.

RETRIEVER

SPY

TABLE RACER

CHECKER

The **retriever** gets the first question and brings it back to the group.
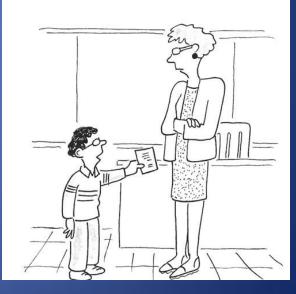

Each member in the group must write the answer to the prompt on their own paper.

Each group may send a **spy** as often as they want to the learning support station.

When EVERYONE in the group has written down the answer, each group MUST send the spy to the learning support station to make certain the answer is correct.

When your group is finished, send the **checker** with his/her paper to the teacher. The teacher will give your **checker** a "thumbs up" approval.

When the checker returns to the table, send the **table racer** to the white board to write the answer under your team number. The **table racer** may not bring the paper with him/her.

When the **table racer** returns, the **retriever** may then get the next question.
